

I used to sit at a window and watch storms. The rain hit the window. I watched lightning come down from the sky. One day, lightning hit a tree. The tree set on fire. It was very close to my house. Nature is full of interesting things. I was very excited by the lightning. It was so powerful.

I met a modern natural philosopher. He told me about electricity. It was very interesting. It was better than alchemy. Alchemy was **worthless**.

I wanted to know more about science when I was 17. I went to university at Ingolstadt.

Elizabeth stayed at home in Geneva. She was sick. She had scarlet fever. Mother was looking after her. Mother caught scarlet fever too. She was very sick. I came home to see her.

“Please Victor, you must marry Elizabeth. Please Elizabeth, you must marry Victor,” she said.

She died. I was very upset. I didn’t want to get married. I wanted to go to university and learn.

I went to university. I found somewhere to live. There was a professor of natural philosophy at the university. His name was M. Krempe. I invited him to come and meet me.

Krempe came to see me at my house. I told him, “I have studied alchemy.”

Krempe said, “You have wasted your time. Alchemy is wrong.”

I was very angry. I didn’t want to study natural philosophy any more. There were many lectures at university. I wanted to attend a chemistry lecture.

worthless (adj) having no value, useless and having no good qualities

Professor Waldman taught chemistry. It was very interesting. I liked chemistry more than natural philosophy. After I met Professor Waldman, I thought, “I will study chemistry.”

I didn’t want to do anything else. I spent all my time studying. I didn’t make any friends at university. I had more important things to do. I ignored my father and Elizabeth. They were far away and chemistry was more important.

I learned a lot. Professor Waldman said, “You’re doing very well.”

I wanted to learn more about life and how to create life. I studied the human body. It was called the study of anatomy. I studied death. I learned what happens to a body when it is dead. It took a long time.

I learned everything from the professors. “We can’t teach you anything else,” they said.

My house was full of research. I had found the secret of life. It was just an idea. I had to test it.

“I’ll make a creature. It’ll be a new race. They’ll be wonderful beings.” I thought.

I made a plan. I worked very hard. It took all my time. I didn’t go and study any more. I didn’t care about my family or friends. I had to finish my creature.

My father said, “Victor, what are you doing? You are possessed! You look so pale. Why are you doing this to yourself?”

"I'll make a creature," I thought.

CHAPTER 2

It took many months. I finally finished my creature. I used electricity to bring it to life. It was a horrible creature. It looked like a monster. I ran away. I locked it in a room.

I tried to sleep but I had lots of nightmares.

I dreamed about Elizabeth. I dreamed about mother's dead body. I woke up. The monster was standing by my bed. He was looking at me. He was smiling. It was a horrible smile. I was so **frightened**.

I ran out of the house and locked the door. I didn't want to go inside. I walked around my garden. I stayed there all night. When it was morning, I walked to the town. I walked past the inn. My friend Henry was there. He had come to Ingolstadt to go to university. I was very happy. I didn't feel lonely any more. I took Henry back to my house.

The monster was gone. I fainted. I was very weak. The shock of the monster and all the work had made me ill. I had a fever. Henry stayed with me. He looked after me. I got better very quickly.

"Thank you, Henry," I said.

"I was happy to help you, Victor," said Henry.

frightened (adj) scared, afraid

*I woke up. The monster was standing by my bed.
He was looking at me.*
